railML.org

Organisational talent? Sought!

railML.org is an international initiative focusing on the standardisation of data exchange and prototyping applicative software for the railway industry. We work together with numerous European railways, organisations, and software manufacturers to create an industry standard called railML.

We are seeking students who want to contribute to our activities by applying their freshly acquired university skills in practice and gain professional experience.

The tasks consist of organising conferences and meetings, communicating with partners and coordinators, as well as PR related work like updating the website and authoring news articles. Furthermore, you will support the communication with the community through emails.

There are no fixed office hours, working from home is possible. Willingness for occasional office days (in Dresden) is required. Practical training/internships with our partners in Europe can be arranged.

Salary starts at 16 €/hour on a freelance basis. Students with long-term declaration of intentions are preferred.

What we offer:
- Flexible office hours
- Practical skills
- International contacts and internships
- Supporting international projects
- Opportunity to develop your existing skills and to learn new ones

What you should have:
- Good command of English and German (written and oral)
- Sense for communication and organisation
- Reliability
- Between 8 – 10 hours per week

Send your application, including your CV, to **student.jobs@railml.org**
