Hello everybody,

here some suggestions about writing railML and its components. (This is only important in official documents, not in the newsgroups.)

1. All individuals dealing with railML® are "the railML.org initiative" (GER: die railML.org-Initiative). More words with the prefix railML.org: railML.org coordinator (GER: railML.org-Koordinator), railML.org homepage (GER: railML.org-Homepage)
2. These individuals created a XML application, the "Railway Markup Language railML®". And example words with the prefix "railML®" are: railML® scheme (GER: railML®-Schema), railML® partial scheme (GER: railML®-Teilschema), railML® element (railML®-Element)
3. Either "railML.org" or "railML®". No other combinations are allowed.
4. All component schemes are part of THE railML® scheme. So we must write: the railML® scheme (= sum of all partial schemes) or railML® partial scheme "timetable" (or "rollingstock" or "infrastructure"). Please notice: The name of the component scheme is written in small letters and inside quotation marks.

Do you have:

- questions or suggestions?
- comments or cons?
- better names?

Please write! Thank you.

Nils Poldrack

PS. An inofficial and unfinished document is available at www.railml.org/documents/internal/phraseology_ger.pdf
