Subject: Re: <track>@mainDir Posted by Torben Brand on Sat, 14 Apr 2018 13:23:42 GMT View Forum Message <> Reply to Message

We use track@mainDir in Norway in railML2.3nor for our use case SCTP and capacity planning.

<track @mainDir>

We use mainDir for three things:

- 1. to indicate on a macroscopic level if the line is single (mainDir="none") or double track (mainDir="up" or "down")
- 2. to indicate the usual driving direction of the double track
- 3. to indicate the position of the track in a mesocopic level (mainDir="up" track on the right side in increasing mileage)

We ask to reverse the deprecation or give us an alternative suggestion towards our mapping needs.
