Subject: Forum server settings
Posted by Torben Brand on Sun, 12 May 2019 11:58:54 GMT

Hi,

I enjoy using the Newstap app on iOs for this forum.
It has worked grest for half a year.
Since one week I get the error message: «Error connecting to the server». The Webservice of the forum works fine.
Has something changed in the settings?
What are the corrrect settings?
