Hi Dirk,

both of your requests have already been implemented for the last RailML meeting in Braunschweig last week.

The abbreviation has become a new attribute for <ocp>. The additional names can be provided as unlimited child elements of <ocp>/<propOther> called <additionalName>.

Please see the log messages for commits #223 and #224:

<http://trac2.assembla.com/railML/changeset/223>

<http://trac2.assembla.com/railML/changeset/224>

For a documentation of the new features please visit the wiki:

<http://wiki.railml.org/index.php?title=IS:ocp>

<http://wiki.railml.org/index.php?title=IS:additionalName>

In case of any question please feel free to contact me.

Best regards,
Volker
