Dear Henrik, Christian,
reading the SUBSET-026 I noticed that the location accuracy Q_LOCACC is defined as "defines the absolute value of the accuracy of the Balise location (i.e., the value 63m identifies a location accuracy of +/- 63m)" with resolution of 1 m.
If Q_LOCACC is the right value (instead of Q_SCALE) we should probably use integer instead of float.

BR

FAbrizio
