Dear Stefan,

- > Dirk do I understand your comment correct that if I would
- > slightly change it to 19:09:00, 19:09:15, 19:09:45 it still
- > would be invalid because they are referring to the same OCP?

Yes of course, it still would be invalid. As I wrote: It is not intended to have ocpRef="ARR-StopArea-Gn" (nor any ocpRef) two times immediately following each other.

If the train passes two parts of the same station in sequence (e. g. two signals, signal boxes etc.), and you want to give passing times for each part of the station, these station-parts have to become separate <ocp>s. See also [1].

Best regards,
Dirk.
