I would change the balises and balise groups as follows

Instead of:

```
  <balises>
    <balise id="BG01_0" countryID="357" groupID="01"
pos="119.700" ndx="0" dir="up" linkingAccuracy="5"
linkReactionDescending="noReaction"
description="E2 Infill balise group"/>
    <balise id="BG01_1" countryID="357" groupID="01"
pos="119.703" ndx="1" dir="up" linkingAccuracy="5"
linkReactionAscending="noReaction"/>
    <balise id="BG03_0" countryID="357" groupID="01"
pos="119.985" ndx="0" dir="up" linkingAccuracy="5"
linkReactionDescending="noReaction"
description="E2 signal balise group"/>
    <balise id="BG03_1" countryID="357" groupID="01"
pos="119.988" ndx="1" dir="up" linkingAccuracy="5"
linkReactionAscending="noReaction"/>
    <balise id="BG03_2" countryID="357" groupID="01"
pos="119.991" ndx="2" dir="up" linkingAccuracy="5"
linkReactionAscending="noReaction"/>
    <baliseGroup>
     <baliseRef ref="BG01_0"/>
     <baliseRef ref="BG01_1"/>
    </baliseGroup>
    <baliseGroup>
     <baliseRef ref="BG03_0"/>
     <baliseRef ref="BG03_1"/>
     <baliseRef ref="BG03_2"/>
    </baliseGroup>
   </balises>
  </ocsElements>
```
