Subject: Re: [railML2] adding new element <area> for the mapping of track sections

Posted by christian.rahmig on Fri, 21 May 2021 10:03:37 GMT

Dear Torben,

the idea was not to replace <area> with <border>, but to limit the types of elements that are referenced via the child element <area / isLimitedBy> to only <border> elements (instead of all the various infrastructure elements). What do you think?

Best regards
Christian
