Subject: Re: Link a "doubleSwitchCrossing" to two switchesIL

Dear Martin,

thanks for your proposal. I have two thoughts for it:

1) When referencing from switchIL it might be confusing if the target can be a switchIS or a switchPartition.

2) The speciality of a doubleSwitchCrossing over a singleSwitchCrossing is not clear. In the interlocking domain they
will be modelled both as two linked switches.

P.S.: For everyone, who has no idea of what is already in railML3.x, please, have a look at https://wiki3.railml.org/wiki/IL:switchIL.
