Dear all,

we have a Gitlab issue #538 [1] requesting support for the description of the possibilities of transporting dangerous goods in the infrastructure. However, I have not found any forum discussion with further details on that request. Therefore, let me ask you, what exactly do you need to be modelled for fulfilling this request?

[1] <https://development.railml.org/railml/version3/-/issues/538>

Thank you very much and best regards  
Christian
