This issue is implemented with the following commit:

<http://trac.assembla.com/railML/changeset/456>

The following attributes are added to the 'speedChange' element.

```
<xs:attribute name="mandatoryStop" type="xs:boolean">
  <xs:annotation>
    <xs:documentation>specifying the speedChange as a mandatory stop point, e.g. in front of a
level crossing</xs:documentation>
  </xs:annotation>
</xs:attribute>
<xs:attribute name="mandatoryBraking" type="xs:boolean">
  <xs:annotation>
    <xs:documentation>specifying the speedChange as a mandatory braking point, e.g. in front of
a descending slope</xs:documentation>
  </xs:annotation>
</xs:attribute>
```

Kind regards...

Susanne
