Hello everybody,

here's a new suggestion for the timetable-schema, together with a little
example. I tried to include everything that was suggested here in the
forum as well as every new field that was recommended within my work
with program interfaces for DB and SBB.

If you are missing something, or if there is the need to add or change
parts of the schema, please mention it soon here in the forum!

Best wishes from Zurich,
J.Rubröder
