Hello,

today I published a full document (RC2) describing all steps for changing a railML(R) partial scheme. [Sorry, many days after the targeted date :-(].

This document is available at
www.railml.org/documents/general/developmentprocess_ger_RC2.pdf

Please, send me your comments. Thank you.

Nils Poldrack

Hello,

today I published the german Release Candidate 3 for "Development Process", available at
www.railml.org/documents/general/developmentprocess_ger_RC3.pdf

Changes to RC2:

- line numbers (only for RC3) for better readability;
- corrected mistakes concerning "railML®" and "raiML.org";
- responsibility for documentation of process (line 145)
- end of chapter 4.3 (line 221 et. seq.)

Please, write your comments. This RC3 becomes obligatory as version 1.0 4 weeks after publishing.

Have a nice week

Nils Poldrack

Hello,

I've some small proposals for the german document, so I'll continue in german.

- Kapitel 3.2.1; Zeile 84-85:
Im Hauptteil des Dokumentes sollten keine Personennamen genannt werden,

Koordinatoren sinnvoll.

- Kapitel 3.4; Zeile 116-123:

- Kapitel 6.2; ab Zeile 354:
Bei den Versionsnummer sollte der ersten Ziffer nach dem Punkt eine besondere Bedeutung zukommen, so dass nicht unbedingt Version X.00 bis X.20 definiert werden, sondern z.B. X.00, X.01, X.02, X.10, X.20, X.21, etc..

minimale Erweiterungen bezeichnet.

Ansonsten freue ich mich schon darauf, wenn dieser Vorschlag verbindlich und implementiert wird.
