Hi there,

The interlocking3.xsd schema (found at your SVN site) seems to be invalid :???:

In detail the complex type KeyLocksIL have duplicate definitions and "invalid comments".

Enclosed zip-file (interlock3.zip) contains both interlocking original and modified versions that may come in handy when the schema is to be modified...

Dear all,

obviously the interlocking3.xsd in the subversion railML3.1-final tag got messed up, i.e. includes diffs of two different commits. I am sorry for the hazzle.

So please use the attached one or the ZIP package from the railML-website.

Regards,
Jörg von Lingen - Interlocking Coordinator

Hi again,
Thanks for the quick response...

Yours
Jonas Ekman
